

WLM WHITE LABEL MARKETPLACE

With the WLM, business owners can tokenize, document, and trade assets conveniently, customizing the look and feel of the user interface to match their brand's unique aesthetic.

Simply license our pre-built dashboard which can be modified to match your project's branding, providing a perfect blend of convenience, personalization, and affordability.

While WLM, unlike our TEOS solution, does not grant you the choice of your own distributed ledger, rest assured that WLM users can upgrade to TEOS at any time while preserving the current state of their project.

What can I do with it

- Tokenize assets:** Make your products and services more tradable at minimal cost.
- Document digital assets:** Ensure asset transparency and increase trust.
- Trade digital asset:** You can trade your digital assets immediately on your marketplace.

Key Benefits

- Fast go-to-market:** Have your own decentralized marketplace in 2 days.
- Transaction security:** Leverage CoreLedger's multi-sign infrastructure to increase transaction security.
- Affordability:** Pay-as-you-go pricing model.

Additional Benefits

- Blockchain migration.**
- Complimentary feature of DocumentDB,** a global digital asset directory, developed in-house.
- Complimentary feature of WARP,** CoreLedger's proprietary multi-party asset-search and matching tool.
